

# Lab: Overriding

## Objective

You will learn to apply the concept of Overriding methods

## Exercise

Write and test a program in Java as describe by the class diagram below

## Report Submission

You need to submit a detailed lab report, with **screenshots**, to describe what you have done and what you have observed. Your report should include the following items:

1. What were the problems that you founded ¿How do you resolved them? Explain
2. Code and comments for main part of code. Include screenshots of the results
3. Recommends for extended the exercise or create a new exercise more complex
